Future of Project

The future of this project is in the Honors College hands, the Figma prototypes are created and tested and would just need to be made real. From there, the main functionalities are working and so new features can be added to the app and or admin web portal. Such as a chat or message feature to events, people can comment on their experience there or post images to further advertise the event. Adding listings of non-honors events or simply news posts along with the events. The app can be integrated into the current OSU app.
