

## **Honors College App - Evaluation plan**

### **Usability testing**

Prototype evaluation to be done by prospective users: think aloud and/or observation of a person completing a scenario, and undirected feedback of the prototype as a whole. Specifically, a form and link to the prototype may be sent out in mass to prospective users for feedback. Individual interviews over Zoom will also be held, to see how the user navigates the app with certain scenario goals.

### **Scenarios**

The following encapsulate specific scenarios that a user may intend to complete on the Honors College App. These scenarios should be completed within Figma.

#### **Scenario 1**

“Navigate to the event info page for Fall Term Brunch and register for the event.”

#### **Scenario 2**

“Navigate the app to view your registered events.”

#### **Scenario 3**

“Navigate the app to turn off notifications and then logout.”

#### **Scenario 4**

[Admin]: “Create a new event or continue editing a saved event.”

#### **Scenario 5**

[Admin]: “Navigate to view your unfinished saved events.”
