

ANNOUNCEMENT EMAILS
INEFFECTIVE AS A
COMMUNICATION METHOD
FOR OSU HONORS
COLLEGE

Current Conditions: Monday Honors College
Emails

An email is sent out every Monday to all Honors
College students listing all events and news for that
week.

- Weekly emails containing events, classes,
scholarship information, etc.

Problem

Current email message is often sent to spam or
ignored because of how disorganized the text is.
With so many events listed, readers would need to
parse through paragraphs of text in order to find
any that interest them, or worse, read the entire
document to see if an event schedule had
changed.

- Long Text/Dense Emails
- Unread/Spam
- Ignored

Solution

The Honors College requests a mobile app that will
organize and categorize event listings. Ideally
transitioning away from the email system to an
Instagram / Reddit style feed, this app will assist
users in finding events, registering for events, and
keeping track of event information.

- An App!

Our team has also created a desktop web
application for admins to more easily create and
edit events displayed within the app.

- Web Version for Admin Purposes

Honors College App

Information, Registration, and Updates Within the
Palm of Your Hand...

MOBILE APP

The Honors College App allows students to easily view the
different honors events occurring at campus and sign up for
an event. The app has multiple pages that are easy to
navigate once they login with their ONID.

Homepage - Students to scroll through events easily and
see the title, date, description and event type. The events
are color coded allowing students to easily differentiate
what events are available.

Detailed View - Students can click on the event to see the
details and sign up for the event.

Registered/Calendar - Allows students to view what
events they registered for, which can also be seen in the
calendar view, which opens google calendar.

Notifications - View all notifications of upcoming events
students have signed up for.
