Project description summary

List of project goals and deliverables

Itemized list of major tasks

Estimated completion time

Designated person per task(do not use names)

Show distribution of tasks across teamates

2-5 visuals

Description of matters (handoffs, interfaces, integrations)

Answer:

- If a web page is being created to display data from a sensor, what format should the sensor use to send its data?
- If the GUI is being built by one member to gather user input for a tool being built by another, what data needs to be gathered?
- How do you imagine re-deploying team members once they complete near term tasks?

Forecast schedule for Winter and Spring

Estimate when tasks will be done

Share project management tool (Asana?)

Sprint goals per terms

1 Fall, 3 Winter, 2 Spring

3 week sprints
