Adrien Protzel
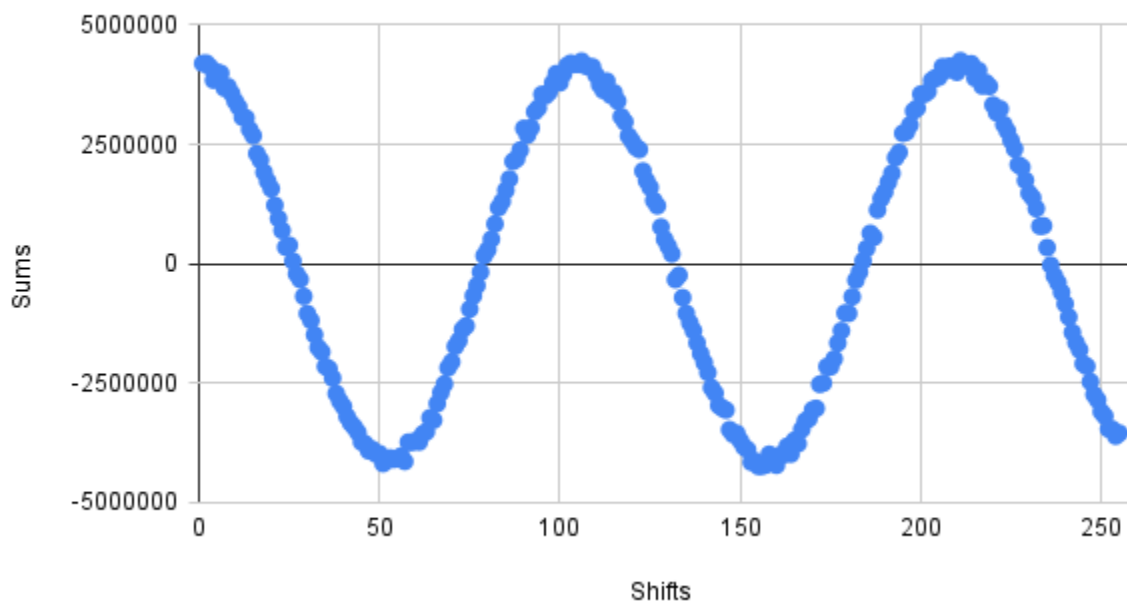

1. (Plot below)
2. Period is about 211-106=105   2pi/|105| = 0.06
3. (Plot below)
4. It is a near linear graph of performance improving with the number of processors given.
5. More processors means more works can be done in a single instance

Sums vs. Shifts

Performance vs. Processors
